## Skills

## Languages

## Profile

Full-stack developer with strong expertise in JavaScript, TypeScript, and Python. Proficient in building scalable, user-centric applications using modern frameworks such as React, Next.js, NestJS, Django, Flask, and FastAPI. I specialize in designing robust backend systems and intuitive frontends, with a growing focus on integrating AI into practical workflows. Currently exploring agentic system design and leveraging tools like Hugging Face, LangChain, and Retrieval-Augmented Generation (RAG) to develop intelligent, task-oriented agents. Passionate about applying technology to streamline everyday tasks and drive real-world efficiency.

## Employment History

### Data labeling & Code Training, Freelance (various Employeers), Tirana

JUNE 2024 – PRESENT

- Conducted data labeling for various clients, ensuring high-quality annotations for machine learning models.
- Achieved a high accuracy rate in data labeling tasks, exceeding client expectations.

### Full Stack - Web Developer, Codevider, Tirana

OCTOBER 2024 – PRESENT

With a strong foundation in frontend development, I have successfully created professional and dynamic user interfaces using React, I have leveraged libraries such as Shadcn. My expertise includes designing responsive layouts, implementing state management, and ensuring seamless user experiences. I am passionate about staying up-to-date with the latest trends and best practices in frontend development to deliver high-quality, performant applications.

I also work on the backend with Nestjs framework which is a great framework for enterprise grade backends.

## Education

### Programim, Gjergj Canco, Tirana
