Professional Summary

Full-stack developer with strong expertise in JavaScript, TypeScript, and Python. Proficient in building scalable, user-centric applications using modern frameworks such as React, Next.js, NestJS, Django, Flask, and FastAPI. I specialize in designing robust backend systems and intuitive frontends, with a growing focus on integrating AI into practical workflows. Currently exploring agentic system design and leveraging tools like Hugging Face, LangChain, and Retrieval-Augmented Generation (RAG) to develop intelligent, task-oriented agents. Passionate about applying technology to streamline everyday tasks and drive real-world efficiency.

Employment History

Full Stack - Web Developer, Codevider, Tirana

OCT 2024 – PRESENT

Following my internship, I transitioned to a backend-first role as a Full Stack - Web Developer. My primary specialization is architecting and maintaining scalable backend systems, specifically using **NestJS**. My expertise includes engineering robust RESTful APIs and managing complex database schemas.

In this role, I also completed advanced generative AI training with **AI Hub Albania**, focusing on practical applications of **RAG systems** and graph-based data models. I continue to contribute across the full stack, proactively identifying and resolving UI and logic-based bugs in the frontend.

Education

Programim, Gjergj Canco, Tirana

SEPT 2020 – MAY 2024

Informatics Engineering (Software Engineering), European University Of Tirana, Tirana

OCT 2024 – JUL 2027

Along with my job and personal courses I take for my personal development in soft and technical skills I am also attending EUT or as it is called in Albania UET to solidify my foundations even better

Internships

Fullstack Developer, Codevider, Tirana

JUN 2024 – AUG 2024

I began my internship at Codevider by proactively tackling backend development tasks. After rapidly completing these initial objectives, I pivoted to support the frontend team to accelerate the project timeline. In this full-stack capacity, I was instrumental in developing a comprehensive HR management solution, engineering key modules for login, asset management, and leave management. Additionally, I provided critical support to the team by identifying and resolving numerous bugs, ensuring a more stable and reliable codebase.
